

Ninja Foodi Beef & Noodles

A straightforward pressure-cooker beef and noodles recipe.

YIELD	PREP	COOK
4-5 servings	10 min	About 45 min

Ingredients

- 1 lb beef stew meat
- 1 Tbsp olive oil
- 2 Tbsp onion powder, or 1/2 cup diced onion
- 1 Tbsp minced garlic
- 1/2 tsp salt
- 1/2 tsp black pepper
- 8 oz diced mushrooms, optional
- 1 can (10.5 oz) beef gravy, optional
- 2 cups beef broth
- 12 oz wide egg noodles
- Cornstarch and cold water, as needed for thickening

Directions

1. Set Ninja Foodi to Saute. When hot, add olive oil. Brown beef on all sides with salt, pepper and onion powder. If using diced onion instead, saute it alongside the browned beef until tender.
2. Stir in garlic, then add beef gravy if using and beef broth. Scrape the bottom clean. Lock the pressure lid and cook on HIGH for 20 minutes.
3. Natural-release for 10 minutes, then release remaining pressure.
4. Add egg noodles without stirring; gently press them into the liquid. Lock the lid and pressure cook on HIGH for about 5 minutes, adjusting for the pasta package time as needed.
5. Natural-release for 5 minutes, then vent. Stir. If noodles need a little more time, replace the lid for 1-2 minutes without turning the cooker on.
6. If the sauce is thinner than desired, use Saute and slowly stir in a cornstarch-and-water slurry until thickened.

Helpful Notes

- A beef-and-onion soup packet can replace the individual seasonings for a shortcut.
